URREA's Set list offers a selection of more than 80 sets, so you will always find the one with the best combination of tools to do your job in the most efficient and cost-effective way. With this extensive list of sets, you'll be able to have the right tool exactly when and where you need it.

**URREA offers three levels of sets: basic, intermediate and master.**

- **Basic Sets:**

Designed for the beginner technician. Containing a range of the most popular or most commonly used tools.

- **Intermediate Sets:**

Containing our basic products in addition to a wide variety and range of tools and specialty items.

- **Master Sets:**

Designed for the experienced technician. Containing the most complete and balanced selection of high quality tools for heavy-duty and specialty use.

This modulation of sets allows the variety of tools to increase as your needs, responsibilities and technical abilities increase.

URREA also offers, in most sets, the possibility of equipping your set with 2, 3 or even 4 cabinet or box options to facilitate organization, safeguarding, storage and transport of your tools.

The sets are designed specifically for the aviation industry, general maintenance, heavy maintenance, and for automotive maintenance and repair.

There are also specialty sets, mainly for heavy automotive service, for changing oil, repairing automatic transmissions, installing or removing bolts from truck chassis, and for quickly removing or align-

ing bolts or nuts in structures. These sets have the right specialized tools for getting the job done most effectively.

When more options for organization and storage are required to complete the sets, they can be complemented with cabinets and boxes like the ones presented in section 2.

In addition to the list of sets presented in this section, a wide variety of tool sets can be found at the beginning of each of the following sections.

**URREA Master Sets:**

- Provide options for more than 450 tools.
- In configurations with roller or fixed cabinets, and metal or plastic boxes.

- With a selection of Hand Sockets and Accessories, Mechanical Wrenches, Industrial Wrenches, Drivers, Pliers and Snips, Striking Tools, Pullers and Clamps, Automotive Tools, Plumbing Tools.

- In fractional and metric system sizes.

- They are grouped and combined in more than 80 sets presented in practical roller cabinets, metal boxes and plastic boxes, which allow them to be transported and kept organized.

- The openings of all wrenches and sockets included in our sets incorporate the SUPER DRIVE® design, which makes them even tougher.

**The information presented in this section is organized as follows:**

- **Quick selection guide for Master Sets.**
- **Summary of the contents of Master Sets.**
- **Detailed contents of Master Sets.**
